JOB OBJECTIVE

A focused professional targeting for assignments in **Software & Web Development** with an organization of high repute in the IT industry, preferably in Pune or Mumbai

EDUCATION

Masters in Computer Science from University of Mumbai in 2022

Bachelors in Computer Science from University of Mumbai in 2020

KNOWLEDGE PURVIEW

Software Development

Coding & Design

Requirement Gathering

Incident Resolution

Root Cause Analysis

Software Development LifeCycle

Daily Status Reports

IT SKILLS

HTML, CSS, JavaScript, Angular

Bootstrap, Node's, MySQL, Github, AWS

SOFT SKILLS

Communication

Adaptability

Analytical

Time Management

Decision Making

PERSONAL DETAILS

Date of Birth: 10th October 1999

Languages Known: English, Hindi, and Marathi

Address: Ganga Kunj Society, 2nd floor, KalasMalwadi Road, Vishrantwadi, Pune – 41101

PROFILE SUMMARY

- A budding professional; completed **Masters in Computer Science**.
- Gained exposure on process requirements and provided use cases for business, functional & technical requirements
- Understanding of **Software Development Lifecycle (SDLC)** right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications
- Understanding of **REST API Development**
- Updated knowledge by **studying state-of-the-art development tools**, programming techniques, and computing equipment, participating in educational opportunities, reading professional publications and maintaining personal networks
- An effective communicator with strong analytical skills and skills to relate to people at any level of business and management

EXPERIENCE

Organization: Octoedge Technologies Pvt. Ltd (sep 2022 – sep 2023)

Role: Front-end Web Developer

Key Result Areas:

- Creating, testing, and deploying fast and scalable web apps
- Designing and maintaining fully functional large relational and non-relational databases
- Incorporating functionalities in apps with responsive mobile design
- Fixing bugs, testing applications along with security and data protection features
- Supporting scalability and ensuring good performance by making adequate core code architecture decisions
- Designing UI components using well-known front-end frameworks like Bootstrap
- Collaborating with other developers for the creation of scalable RESTful APIs
- Reviewing code of peer developers
- Developing user interactions on web pages
- Ensuring web design is optimized for smartphones; building reusable code for future use
- Optimizing web pages for maximum speed and scalability
- Managing the maintenance of program modules including operational support, problem resolution, production support, preventative and corrective maintenance and enhancements
- Assisting in determining operational feasibility through analysis, problem definition, requirement analysis, and proposing solutions
- Performing analysis, design, verification, demonstration and maintenance of products in a process-driven, team environment
- Contributed to software improvements (products, processes, methods, tools), design inspection and code review
- Participating in requirements gathering for enhancements and creation of high-level as well as detailed-level design documents
- Liaising with stakeholders during problem diagnoses, requirements gathering, detailed level design, development, system test and production implementation to ensure that optimal resolutions were achieved

PROJECT

Student QR Attendance System (Dec' 22 – Jan' 23)

Environment: Angular, Node JS, HTML, CSS, Bootstrap, JavaScript.

Database: MySQL, SQL

Description: The system maintains student attendance records efficiently and in an orderly manner. It gives teachers immediate access to accurate data about students' attendance, making it much easier for them to keep track of attendance

Responsibilities:

- Developed the front-end side such as admin and student pages as per client requirements
- Designed web pages that met user goals
- Created responsive design and lightweight front-end pages in angular 13.
- Utilized HTML5, CSS3, and Bootstrap to design pages

Restaurant Management System (Jul' 22 – Nov' 22)

Environments: Angular 13, 14, NodeJS, Express, Bootstrap5, JavaScript, CSS & HTML 5

Database: MySQL

Description: Managed orders from customers and generates bills by calculating the total amount
